# MINING, BUSINESS AND STOCKS

# PARRISH VISITS MINES AT PIOCHE

Salt Laker Greatly Impressed With Southern Camp and Its Prospects.

DEMIJOHN AND LUCKY BOY

Saw Something Interesting at Thes Properties-Prince Con, and Ohio Kentucky.

After spending a week at Pioche, F. E. Parrish of Z. C. M. I. is again at home. The entire time of his stay was spent in and about the mines of that district, especially the Lucky Boy, of which he is president, and the Pioche-Demijohn, in which he is a stock holder. He reports the prospects of the camp to be most promising, and on every hand there is an activity that bodes well for the future of Pioche With the splendid railroad facilities already there, and projected roads in every direction, there will be no dearth of means of transportation, and development is now going on in a manner that indicates a rushing business for the San Pedro and its branches in the

Mr. Parrish comes nome much en-thused over the camp, especially with the properties in which he is interested, from which he has displayed as pretty specimens of copper ore from the Lucky Boy as have been seen here in many a day. The samples are from a four-foot day. The samples are from a four-foot vein recently encountered in the main shaft. Timbermen as well as miners are busy and each day brings them nearer the goal set out for, a point at which to tap the great fissure. The silver values run up to 350 ounces, and there are good values in gold and lead, in addition to the big vein of 33 terms of the counter second transport contents.

per cent copper, recently uncovered.
Conditions at the Pioche-Demijohn are no less encouraging, says Mr. Parrish, than at the Lucky Boy. Both will rish, than at the Lucky Boy. Both will be shipping heavily in a comparatively short time. One of Clark's projected lines will pass within a few hundred feet of the Demijohn shaft, and will lessen the distance by half from the Lucky Boy to the railroad. At the Prince Consolidated and Ohio Kentucky mines development work is being push. mines development work is being pushed ahead steadily and with the usual gratifying results. Both will be big producers of ore.

#### ON MINING EXCHANGE.

#### A Heavy Market Prevailed This Week -Today's Quotations.

—Today's Quotations.

A heavy market prevailed this week for mining stocks. However, the sales amounted to 531,701 shares, representing a valuation of \$267,716.54. Today's trading was light, the total sales aggregating scarcely more than \$20,000. Ohio Copper has been depressed—purposely—and there is every indication that the eastern interests want to drag in some more cheap stock before attempting to do any boosting. In the meantime, General Manager Colin McIntosh is organizing his forces. The Mascott tunnel is being pushed ahead and the equipment for the mill not already on the ground, has been ordered shipped. Silver King Coalition has been bought around \$4 & share. Today's closing quotations and sales were:

# COULDN'T BE BETTER.

Manager Orem Well Pleased Over Conditions at the Nevada Douglas.

General Manager Walter C. Orem of the Nevada Douglas Copper company the Nevada Douglas Copper company has returned from a trip to the Nevada Douglas mine at Yerington, Nev., decidedly well pleased with conditions there. "You can say," said Mr. Orem to the "News" today, "that the ore bodies of the Nevada Douglas are getting deeper wider and longer as we get ting deeper, wider and longer as we get into them. The condition of the mine is simply fine—it could not be much better. Another body of rich chalcocite copper ore has been opened on the south 550 level."

## BINGHAM NEW HAVEN.

Company Now Marketing One Hun-

dred Tons of Ore Daily. Without attracting any attention whatever, General Manager Charles H. Doolittle of the Bingham-New Ha-Doolittle of the Bingnam-New Haven Mining company, has resumed production again. The mine, which is in Bingham, ceased shipments of ore last December, when the smelters called on producers to slow down. In the meantime, development work has called on producers to slow down. In the meantime, development work has been going on steadily with the result that the available tonnage in the mine has been very materially increased. The physical condition of the property was never better than it is now, and neither has the mine ever been quite as well equipped to operate along the lines of economy. In this connection, the opening of the lower transportation tunnel which enters the mountain just above the main works of the Utah Consolidated mine, has had much to do towards lowering costs. Not only has the necessity of hoisting ore been entirely eliminated, but it is no longer necessary to haul coal and other supplies up a steep and dangerous grade, one that has been responsible for the death of many dumb brutes. In winter, this road was often impassible and greatly handicapped the mining company in making progress. The aerial tramway has been shortened about 1,500 feet, leaving the present length 3,000 feet, to conform to the requirements of the transportation tunnel. Like other mining companies operating in Blingham, steam power has been supplanted by electricity at the Bingham-New Haven, so in the future there will be no fuel problem to worry about.

The mine is producing about 100 tons of ore per day, and is brought down

The mine is producing about 100 tons of ore per day, and is brought down from the mouth of the tunnel to the receiving bins located down from the mouth of the tunnel to the receiving mouth of the tunnel to the receiving bins located on the Copper Belt rail-road track and only a short distance above the new Yampa compressed plant. The Bingham-New Haven ores contain values in gold, sliver, lead and

# LITTLE CHIEF IS **GETTING DEPTH**

Shaft Is Completed to Fourteen Hundred, Where Station Is Being Cut.

PICNIC MAY RESUME SOON

Sioux Consolidated Equipment in Commission-Other Tintic

Mining News.

Special Correspondence. Eureka, Aug. 14.-In a little less than three months, 400 feet of sinking has been accomplished in the shalf at the Little Chief, which breaks all records for shaft sinking in this district, and on Thursday evening the 1400 level was reached. Supt. Hanifin states that a station will be cut at the 1400; that some prospecting will be done on this

some prospecting will be done on this level also on the 1200.

A party consisting of Kingdon Gould, Rush C. Estee of Montepler, Vt., Geo. R. Danehy of New York, Carlos Espanoso of Lima, Peru, and Frederick Kruse. Jr., of New York, came to Tintle last Monday evening in a special car belonging to young Gould, and Tuesday and Wednesday were put in in visiting the different mines of the district, among them the Swansed, Colorado, Centennial Eureka, Black Jack and Dragon Iron. The party was piloted over the district by Supt. McCaffery of the Tintic smelter, L. E. Riter Jr., and Fred Huntsicker. William Knight and W. N. Rosberg accompanied the party on a portion of the trip, which was made so that the visitors of the district could obtain a knowledge of the geology of the great Tintic district.

Tintic district. The shipments of ore from this dis-trict for the past week mounted to 89 carloads, the contributing mines and mounts being

Centennial Eureka, 41; Bullion Beck,

Uncle Sam, 6; Colorado, 16; Eagle and
Blue Bell, 1; Carisa, 2; Gemini, 3; Bullock 1. The Grand Central sent nine
cars to the local smelters.

Supt. Treloar of the Victor Con.,
states that he is yet unable to state
definately when the company will resume operations, but now that the
company is free from litigation it
should not be long. The Victor ore
contains values principally in copper.
The old Picnic property, which in
the past has produced some shipping
ore, but for a long time past has been
idle, may resume work. At a recent
musting the following officers were
elected. William H. Tibbers, president; A. A. Pike, vice president; W.
H. Child, secretary and treasurer, who
with William Bradley and Frank
Schuyleh compose the directorate. The
company owns five claims, a portion
of which takes in a part of the Silver company owns five claims, a portion of which takes in a part of the Silver City townsite. There is good reason to believe that the property will again be-

believe that the property will again become productive.

The affairs of the Zuma Mining company and J. C. Jensen, of Provo, have been satisfactorily settled and it must be gratifying to the stockholders of the Zuma to know that they have at last been freed from a protracted litigation suit, and that they now can go ahead with the development of their ground. Mr. Jensen was here Monday last and met with the board of directors of the Zuma, and a friendly and satisfactory settlement was agreed upsatisfactory settlement was agreed up-on. The protest made against the com-pany's patent has been withdrawn. The company will immediately put on the market treasury stock so that the the market treasury stock so that the work which was temporarily abandoned last fall can be continued. Already \$15,000 have been spent in developing the property, the major part of which went into machinery and other equipment. The company has erected a very fine shaft house. A 35 horse power hoist has been installed, and also a three drill electrically division and also a

three drill electrically driven compres-The Bullock mine over in the south

The Bullock mine over in the south end of the district marketed one lot of silver-lead ore this week. The new shaft at the Bullock property has reached a depth of about 40 feet, and new hoisting equipment will soon be installed. The new shaft being sunk on the Tintic Central ground, over near the Bullock, is also down 40 feet.

The McKinley company levied another assessment, No. 12. A shaft has been sunk 500 feet and two drifts are now being run to cross-cut the territory. These drifts which are going both east and west have been run about 20 feet, and the one west of the shaft is cutting through some very encouraging ground. Henry Matsch, the managing director of the company, is highly pleased with present conditions.

Del Roberts is now in charge at the

pany, is highly pleased with present conditions.

Del Roberts is now in charge at the Sloux Con. mine. He states that the new machinery is all in position and the new hoist is running nicely, and that before the beginning of the coming week will have a force working on ore. The new Eureka Hill railway has put in a switch to the Sloux which will greatly facilitate the movement or ore in the future.

## COLUMBUS CONSOLIDATED.

Mill Is Turning Out Fifteen Tons of Concentrate Daily.

Supt. A. O. Jacobson of the Columbus Consolidated and other mines at Alta is in the city today and brings the information that the Columbus mill is now operating with three shifts a day, the net return of which is 15 tons of concentrate. Mr. Jacobson says it has been necessary to concentrate. of concentrate. Mr. Jacobson says it has been necessary to operate the mill steadily in order to keep the ore being broken on the 400 level out of the way of development forces. The ore opened on this level is mostly of a milling grade.

onditions at the South Columbus, Mr. Jacobson says, are very satisfactory—particularly on the lower levels.

# WHY MARKET

weakening stock market of the week has been due largely to technical causes, and has not been accompanied by any radical change in the conditions on which the previous advance was based. Some trouble over previous assumption as to trouble over previous assumption as to the rate of improvement in business to be expected, notably in the iron and steel trade, where recognized authorities on the trade have uttered a conservative note of warning. A reaction in the price of copper was another disturbing influence. Sensational methods in the stock market campaign and fears of its over-extension have had more to do with the setback than anything else. Money has continued easy and confidence after the crop yields undisturbed. Prices were on the down grade at the opening today but the losses were confined to moderate fractions and selling was not on a large scale. Union Pacific, American Smelting and Amalgamated Copper lost %.

Bull operators took hold of the market immediately after the opening and market up the various leaders sharply in an effort to drive in the short interests. The high prices invited realizing and short selling again and the entire market fell back to the opening level or below. Chicago, St. Paul, Minneapolis and Omaha preferred broke 7 points.

The market closed active with the rally in progress. Heavy selling of Ameritican Smelting was resumed in the second hour and sold down to 90%, a loss of nearly 3 points.

The break in this stock had a sympathetic effect on the general metal group, particularly for U. S. Steel, which dropped to 44. The general railroad list, however, showed some resistance to the movement, losses three being confined to about ¼ to ½ although Union Pacific relapsed a point. INFSTOCK. the rate of improvement in business to

#### PRODUCE.

Chicago, Aug. 15.—The wheat market was active and easy at the opening to-day, weak cables being the factor. September opened \( \frac{1}{2} \) \( \frac{1}{2} \) d lower to a snade higher at 93\( \frac{1}{2} \) to 94\( \frac{1}{2} \) and sold at 94\( \frac{1}{2} \). September corn opened \( \frac{1}{2} \) \( \frac{1}{2} \) d \( \frac{1}{2} \) and to 42\( \frac{1}{2} \) and then declined to 76\( \frac{1}{2} \), sold at 76\( \frac{1}{2} \) and then declined to 76\( \frac{1}{2} \). September oats opened \( \frac{1}{2} \) to \( \frac{1}{2} \) lower at 46\( \frac{1}{2} \) to 45\( \frac{1}{2} \) and held within that range.

ange.
September pork opened 10c. higher at 5.05, lard opened 5c. higher at 9.30, and ibs were up 5c. at 8.70.
Wheat—Sept., 92; Dec., 947; May, 98.
Corn—Cept., 75%; Dec., 63% @67%; May,

2% @ 62%. Oats—Sept., 45% @ 46%; Dec., 45; May % @ 48. Pork—Sept., 15.07%; Oct., 15.22%; Jan Lard-Sept., 9.37; Oct., 9.40; Jan., 9.17½ Ribs-Sept., 8.70@8.72½; Oct., 8.80%

Ris-Scash, 78.
Rye-Cash, 62@65.
Earley-Cash, 62@65.
Timothy-Sept., 3.0@3.75.
Clover-Oct., 12.25.
Heavy sales by several leading longs caused a severe slump in the last half of the session, prices declining more than ic, from the high point of the day. September broke to 323 @92%. The market closed weak with September %@1c. up at 3314.

at 931/s.

Corn-The slump in wheat and a break of more than 1c. in the price of the cash grain imparted additional weakness later in the day. September sold off to 751/s. The close was weak, September being down 11/s @11/4 at 75 1/4. SUGAR AND COFFEE.

New York, Aug. 15.—Sugar, raw, dull. Pair retining, 3.50@3.53; centrifugal, .96 est. 4.00@4.04; molasses, 3.20@3.28. Refined-Quiet, Crushed, 5.20; powderd, 5.20; granulated, 5.20. Coffee-Quiet, No. 7 Rio, 616; No. 4 santos, 856.

#### WOOL. ST. LOUIS.
